

HARE TOKEN

HARE Whitepaper 3.0

HARE Whitepaper 3.0

Hare is a new decentralized and community-centered cryptocurrency. Planned to be launched in June 2021 and its goal is to become one of the fastest-growing cryptocurrencies in the world.

Hare is the pioneer blockchain platform integrating independent research & development and incubation. Our products include Hare Wallet, Hare Chat, Hare Swap, Hare NFT, Hare Farms, Hare Gamefi and collaborate with S6 Exchange for investment incubation.

Hare values users very much and strive to serve to the very best. Due to the fact that the Management Authority of the old HARE contract had sent to Burned Address, it has been greatly restricted the progression of Hare. Also, having many decimals, Hare has lost valuable development opportunities to be listed on Exchanges. After operating for nine months with more than 150,000 holders, Hare will officially replace the contract with Hare Plus. Hare is moving towards a better goal with new products and content to make Hare better than before.

01 HARE Wallet

Hare Wallet is a safe, convenient and professional One-Stop digital asset management platform. It supports multi wallet management, exchange asset docking, all public chains and ecological applications on the chain.

Platform covers the functions of Multi Chain Wallet, data, financial management, DAPP ecology, Gamefi, transactions, blockchain payment etc. User assets are fully displayed through contract analysis, high-quality AI recommendation through data analysis and financial management. Also, one-click staking and optimal transactions are realized through aggregation of defi tools. In the new era of defi, users can fully understand the current data and operate conveniently to manage assets, reduce user risks and realize asset appreciation.

Adhering to the mission of "security", hare wallet is committed to providing ordinary users with a safe, easy-to-use and powerful digital asset wallet application.

Functions

- 1.The private key is self-contained to ensure that 100% of the assets are under their own control
- 2.Light Wallet Function
- 3.Support multiple digital assets
- 4.Support the whole ecology of DAPP

Convenient & Selective

Focus on DAPP field; select the best Defi and Gamefi just for you. Enjoy defi and games anytime you want with ease.

It also provides seamless, simple and secure connection between blockchain network and any decentralized application.

Safety & Security

- 1.All node security isolation technology
- 2.Safe offline wallet refrigeration technology
- 3.Security verification biometric technology

Hare Wallet allows independent control of assets, attaches importance to users' privacy, always puts the safety of users' assets in the first place. It provides the highest level of security protection mechanism, adopts the separation of hot and cold wallets from storage, and security monitoring for 24 hours. At the same time, it adopts hardware multi signature deposit and withdrawal mechanism, seven layers of security protection strategy adopted, double authentication, biological authentication and two-step authorization. All these are to ensure the safety of users' assets.

02 Hare Chat

Hare Chat is a secure, reliable and convenient mobile communication application designed to provide blockchain users with access to the blockchain world.

Hare Chat Specifications

- | | |
|------------------------|--------------------------|
| 1.Highly Encrypted | 4.Ecology |
| 2.Private Chatting | 5.Cryptocurrency Centric |
| 3.Industry Information | 6.Wallet Integration |

Hare Chat Perks

1.Security & Global Interoperability

With strategic messaging system implemented, tons of messages have been successfully sent out; provides swift re-encryption action in a fast pace environment for millions of daily activities to ensure user information is highly secured.

2.Reliable Community

Combining Telegram and Blockchain features, Hare Chat provides you the most integrated application for the blockchain community by connecting everyone with just a click.

3.Latest & Comprehensive Resource

supports various third-party services. One phone number connects to blockchain world applications, as well as Swap Exchanges.

4.Access to latest market information

Latest cryptocurrency market information available. Supported by many Blockchain browsers.

Hare Swap

Swap

Hare Swap is a token exchange protocol based on Binance Smart Chain. It is decentralized, unlike traditional exchanges, all transactions are conducted openly and transparently on the chain.

Hare Swap works along Pancakeswap, investors can easily trade tokens in Pancakeswap without using VPN.

Hare Swap supports the display of the white list icon of trending meme tokens. Without entering the contract, hareswap can quickly search for the corresponding token and do trading instantly, brings a pleasant experience to investors.

Note: if the currency you purchased is not displayed on HareSwap with white list and icon,

Please contact our customer service personnel to add.

Liquidity Pool

The liquidity pool allows you to provide liquidity by adding tokens to the liquidity pool.

When adding a token to the liquidity pool, you will receive a Liquidity Pool (LP) token.

For example, if you deposit HARE PLUS and USDT into the liquidity pool, you will receive HARE PLUS-USDT LP tokens. The number of LP tokens you receive represents your share in the HARE PLUS-USDT liquidity pool. Redemption of funds can be at any time by removing liquidity funds.

Hare Swap solves the fast transaction of Hare. In addition to the low handling fee, it will also support more project parties in need to connect with hare swap to achieve a win-win situation.

Note: if the currency you purchased is not displayed on HareSwap with white list and icon,

Please contact our customer service personnel to add.

Liquidity Pool

The liquidity pool allows you to provide liquidity by adding tokens to the liquidity pool.

When adding a token to the liquidity pool, you will receive a Liquidity Pool (LP) token.

For example, if you deposit HARE PLUS and USDT into the liquidity pool, you will receive HARE PLUS-USDT LP tokens. The number of LP tokens you receive represents your share in the HARE PLUS-USDT liquidity pool. Redemption of funds can be at any time by removing liquidity funds.

Hare Swap solves the fast transaction of Hare. In addition to the low handling fee, it will also support more project parties in need to connect with hare swap to achieve a win-win situation.

Hare Swap solves the fast transaction of Hare. In addition to the low handling fee, it will also support more project parties in need to connect with hare swap to achieve a win-win situation.

04 HARE NFT

Disclaimer: Management Right of Hare main wallet had sent to Burned, adding of NFT contract white list to hare token is unavailable. Therefore, Hare will only be able to use NFT to purchase blind boxes / auctions / transactions with BNB. Revenue from NFT will be in the NFT contract. When there are more than 500 BNB in the contract, Hare will use half of the amount to purchase back Hare Plus and send to Burned Address. The remaining half is used as marketing expenditure.

Hare NFT is an ERC721 asset developed based on Binance Smart Chain blockchain in-games, NFT (such as characters, equipment, pets, etc.) is an encrypted asset, while in the architecture design of Hare NFT, NFT is also a "staking machine". Different NFTs have different attributes according to different types. We can generate NFT fragments through NFT mining to synthesize the corresponding NFT.

NFT Blind Box

We will put the hare NFT into the blind box. Players can use the hare token to extract the blind box and draw NFT with different image, computing power and rarity. The blind box probability will be recorded on the blockchain to ensure openness and transparency.

At the same time, we will work with many project parties to jointly launch limited edition and joint branded NFT to build an NFT ecological alliance.

Blind box introduction

1. 21 blind boxes will be released in phase I, and the price of each blind box is 0.5 BNB
2. After successful purchase from the blind box, it will be a random NFT character
3. Each NFT role is different from 100-1000
4. The captured blind box can be auctioned and offered freely by the hanging trading system
5. The project party retains the NFT role of power 900-1000 and directly auctions

NFT Auction

NFT market is a very special and interesting auction mechanism in addition to NFT hanging order trading.

1. If you have NFT, please click my NFT list and click the auction button
2. Select the role in my NFT list for auction, and you can bid for auction freely
3. The countdown is less than 1 hour. After each auction, the countdown will increase by 10 minutes, up to 1 hour

NFT Transaction

NFTs that players can get through auction channels, blind box channels, gifts from friends and other means can be freely traded in the NFT market. 10% of the transaction volume will be extracted for each transaction, and the success of the transaction will be recorded on the blockchain to ensure openness and transparency.

1. For successful purchase, ensure that you have sufficient BNB for fee in your wallet
2. Select my hare NFT and click the sell button
3. Input selling price then click OK to list it on the market
4. After successful purchase, click on "My NFT" to receive the NFT.
5. NFT transferring will only take place when the transaction is successful.
6. The handling fee is 10% of the trans-

05

HARE Farms

HARE Farms consists of two parts: HARE NFT Farms & HARE Liquidity Mining

HARE NFT Mining

NFT computing power is one of the most important attributes of NFTs. The rarer the NFT, the higher its computing power and faster the mining speed is. NFT mining pool makes decisive distribution according to the staked NFT computing power to produce NFT fragments, which can be sold through the trading market or synthesized into a complete NFT

HARE Liquidity Mining

Obtain token rewards by staking the HARE LP pairing of user assets to Hare Farms.

Hare Liquidity Pool contains: HARE and other tokens for users to choose freely.

06 Hare App Store

Hare App store is the world's first blockchain game store, which aims to provide users with comprehensive, high-quality and accurate blockchain game download services. In here, there are a selection of many blockchain games, some of which are independently developed by Hare. The purpose of hare app store is to find the most fun blockchain games.

Functions

1. Selection of games with extensive criteria
2. Exclusive "manual recheck" audit to ensure application safety
3. Trending games available at all times
4. Weekly editing recommended classic games.
5. Support the function of game forum.

Resource

1. Has a R&D team for Blockchain game and has developed two sophisticated games.
2. Reach in-depth cooperation with many game associations and seamlessly connect the platform games with the associations.
3. Hare has 120,000 users worldwide, including 60,000 active users

Developer Centre

Hare App Store's Developer Centre is a one-stop platform for developers to welcome third-party blockchain developers to launch their games, help developers solve problems related to game launch, update and maintenance, and make unremitting efforts to bring extreme experience to developers.

07

Hare Values

Transparency

By maintaining open communication, Hare enables players and the community to know the dynamics of each phase of the project.

Community

The number of people in hare community 100,000. Volunteers are welcome to manage, develop and promote the community with us. At the same time, we will strengthen community partnership with more projects.

Trust

In the field of cryptocurrency, trust is irreplaceable. Hare Project has passed the Certik security audit.

Longevity

Hare looks forward to establishing a long-term relationship with you. A major investment will come from our long-term plan, which does not depend on temporary trends.

08 HARE PLUS Tokenomics

HARE PLUS Token Distribution

HARE PLUS is based on BSC (Binance Smart Chain). Distribution of Hare Plus will remain the same as that of the original Hare. It will be migrated and replaced according to the original HARE 100,000:1

Token Symbol: HARE PLUS

Total Supply: 100,000,000,000,000,000

Contract Address: 0x78c6E90aFa87E2C97cac1A07652Aa0998C6C9078

Burned: 52.2308% 47,769,200,000,000,000

Main Wallet : 18%

Airdrop: 5%

Hare Team : 8% (Locked)

LP: 16.7692% (Locked)

Players will deduct 10% of the transaction fee for each transaction:

5% added to LP

5% is distributed to all holders as the rights and interests of the holders
